I'm waking up and something's on
A break of dawn with all to see
I'm feeling light it's alright
Gone are the clouds that sometimes fool me

I'm realizing how predictable I am
What once was mystery
Is all a simple truth of who I am

Today is a brighter day
The rain is finally over
And the sun is here to say
That if it fades away
It is always there to take me
To a better place

I wanna grow I wanna know
I wanna show you who I am
I wanna see I wanna feel
I wanna learn to catch each moment

So don't be jaded now
And step into my world
I keep an open mind
'Cause deep inside I am just a little girl

Today is a brighter day
The rain is finally over and the sun is here to say
That if it fades away
It is always there to take me to a better place

Come a little closer and see
Just come a little closer
And you will find it's meant to be

Today is a brighter day
The rain is finally over and the sun is here to say
That if it fades away
It is always there to take me to a better place
